Hi Wally,

Ok, thanks for the reply. We will make sure to safely manage the wells before King County decommissions them at the end of the project. We will stay in touch throughout.

Jeff may be best to handle the second part of my email. We are hoping to get from you the sampling data and well logs. Let me know if those are available.

Thank you,
Tom

Hi Tom,

EPA has no problem with this delay. EPA's only required involvement at this point is to ensure that any 'post-removal site controls', i.e. the management of the monitoring wells, is done properly so no harm can be done to the site through the mismanagement of those wells. Of course, we are interested in the best environmental outcome at the site and will continue to encourage you on and assist if possible.

Including Jeff in case he has something else to offer.

Thanks for reaching out.
Wally

Subject: RE: May Creek Check-In

Hi Wally and Jim,

I am writing to ask for a small change to our previously agreed sampling plan. We initially had agreed to sample the May Creek wells quarterly for two years starting this month. However, our QAPP and other preparations have slowed us down. We would like to pick up the sampling starting in Jan 2020 and sample for two years. We would sample the same number of times, and just push our first sample back by a quarter. Let me know if this is acceptable to EPA and King County.

Also, Pam, copied here, is supervising this work and has just hired a hydrogeologist to do the work (yay!). She is

looking for the data from the first round of sampling and the well logs. Are you able to send her this info?

Thank you and feel free to call if you would like to discuss.

Thank you,
Tom
